

Alera® DynaLine Pro Alternating Air Mattress - Single

Code: CBR2277

The Alera® DynaLine Pro is an advanced pressure care mattress system designed to enhance comfort and support while helping prevent and manage pressure injuries. It combines active alternating pressure with gentle low-pressure relief for optimal care. Caregivers can easily customise settings using the intuitive LED weight display. Built for durability, the mattress features 5-inch TPU air cells for long-lasting performance and a bi-elastic PU-coated cover that's antibacterial and washable at high temperatures, ensuring hygiene and infection control.

FEATURES

- Accessible CPR emergency valve
- Quick connector with cap ensures the mattress remains inflated during a power outage or transport
- Head zone comprised of three fully inflated static air cells to provide comfort
- Comfort adjustment that changes the cell pressure to suit the user
- Foam base layer for comfort and to prevent bottoming-out
- Quiet pump
