

A2

## Rinse additive

### Description

Suma® Unison Clar A2 is a concentrated low foam general purpose rinse additive for machine ware washing.

### Features

Suma® Unison Clar A2 is a concentrated neutral rinse additive. It has been formulated for use in a wide range of ware washing machines and washer disinfectors. The special blend of non-ionic surfactants is designed to lower the surface tension of the final rinse water. This prevents droplet formation, and because the water sheets off the surface in a thin layer, drying times are also reduced. It also prevents heavy foaming in the machine.

Suma® Unison Clar A2 is effectively dosed with the Diversey Unison system, which combines excellent performance, safety and convenience.

### Benefits

- Ensures quick drying.
- Gives streak and spot-free results.
- Being highly concentrated gives excellent economy in use.
- Convenient pack is easy to handle with less plastic waste.
- No contact with chemicals due to innovative packaging design.
- Compatible with soft metals.

### Application areas

- Hospitality
- Lodging
- Healthcare
- Food Service

# Unison Clar

A2

## Rinse additive

### Directions for use

Suma® Unison Clar A2 is normally injected into the final rinse water of dishmachines using Diversey automatic dispensing equipment at a rate of 0.2-0.4ml per litre or integral dosing pumps at a temperature of 82-90°C. Actual dosage levels are determined to local site conditions. Please consult your Diversey representative for optimum performance. Rinse product contacting surfaces with potable water after use.

### To Install Full Bottle:

Turn bottle upside down and place squarely into the Unison Dispenser with the handle at the top left hand corner. Push down firmly to locate into the spigot.

### To Remove Empty Bottle:

Lift out of unit and discard.

In New Zealand: MPI Approved C 31 (All animal product except dairy).

### Technical data

Appearance	Clear blue liquid	pH (neat)	5.5
