Product Description

ABENA Fix Net are unisex thin mesh fixation pants for multiple use. Mesh knit technology is based on warp knitting, a method where the yarn is knitted in zig-zag stiches through the length of the fabric. ABENA Fix Net pants feature horizontal stabilising zones, ideal for keeping larger pads securely in place. Despite of the light construction, the mesh products are durable. ABENA Fix Net pants have color coded waistbands for easy size identification. The bags are color-coded for easy product identification together with product name, washing instructions and material composition, 87% polyester and 13% elastane.
